Executive Summary

Stacia Corp is a product development and machine design firm that specializes in providing innovative and sustainable solutions to the agriculture, food processing, and energy sector. Our expertise and state-of-the-art technology enable us to design and develop high-quality solutions that meets the specific needs of our clients.

Our focus on innovation, sustainability, and quality enables us to deliver cutting-edge products that help our clients increase productivity, reduce costs, and promote environmental sustainability. Our dedication to dedicated practices ensures that our products are not only efficient and effective, but also environmentally friendly.

01

About Stacia Corp

Stacia Corp is a MSME, and Government of India recognised Start-up created as a R&D lab aimed to solve engineering problems for industries of various genres. Stacia Corp provides efficient and effective solutions in the form of engineering design or innovative ideas. We also specialise in providing niche, customizable solutions to client.

Stacia has successfully executed a variety of projects in different verticals. We have often served as a client's one-stop-shop throughout the life cycle of product design & development. This approach helps the client engage with Stacia Corp's expertise from plan to production. Through this approach Stacia collaborates and handholds the client in identifying and solving roadblocks in the business process.

We have demonstrated cutting-edge expertise in providing solutions in launching new products. In a short span we have forayed into several such product development for our clients.

OneDril

OneDril is a revolutionary seed sowing machine developed to solve the problems faced by farmers in the traditional method of manual planting. Our machine can be operated both manually and with a tractor, reducing the efforts of farmers and increases the efficiency of planting.

With the ability to plant different types and sizes of seeds, and the option to vary the spacing between the seeds, our machine significantly improves planting accuracy and efficiency.

The OneDril seed sowing machine operates on the principle of line sowing and seed metering mechanism, making it compatible with a wide variety of seed sizes, suitable for all types of micro ranging from as small as millets and small-sized seeds. 2mm to 25mm.

Our Other Designs

Stacia Corp takes pride in its diverse portfolio of innovative designs that cater to various industries and needs. With our exceptional team of designers and engineers, we continuously strive to create products that are not only visually appealing but also functional and user-centric.

From sleek consumer electronics to robust industrial machinery, our designs embody a perfect blend of form and function. We pay meticulous attention to detail, ensuring that every element is thoughtfully crafted to enhance usability, efficiency, and aesthetics.

Tamarind Pod Breaking Machine

Salient features

- Highly efficient
- Portability due to its battery operation
- Lightweight due to optimized selection of material.
- Occupies Less Space
- High Temperature Operability

Our custom chili ladling machine is a specialized product developed exclusively for the **Aachi Group**. Designed and manufactured with precision engineering, this machine is capable of handling large quantities of chili with minimal human intervention.

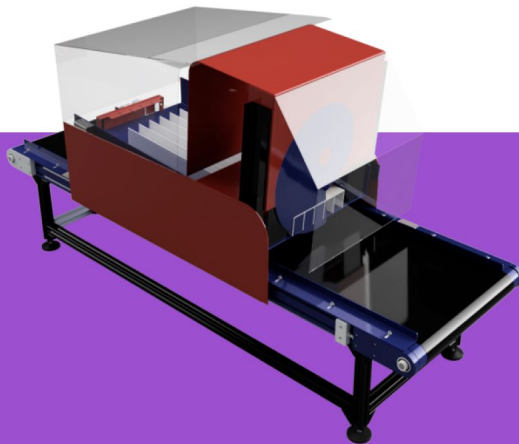

Chili Ladling Machine

The purpose of a chili ladling machine is to effectively ladle (mix) the chilies. The chilies are picked up from the ground using a food-grade plastic cleated belt conveyor, and they then return to drop the chili from the same location from which they were originally picked up. The conveyor is directly driven, greatly increasing the machine's efficiency. Because the vehicle is remote-controlled, it will be driven by someone outside. This will work well in other industries where picking the product up off the ground and packing it are requirements, along with uniform drying.

Precision Slicing Machine

The Stacia Precision slicing machine is a high-performance device designed for accurate, consistent slicing of bread loaves and potatoes. It can slice loaves into thin pieces, starting from 3mm in thickness, and handle up to 5 loaves simultaneously for continuous production. Advanced features like an adjustable conveyor, blade, and linear actuator speed ensure optimal slicing based on the required thickness. This versatility makes the machine ideal for various slicing needs.

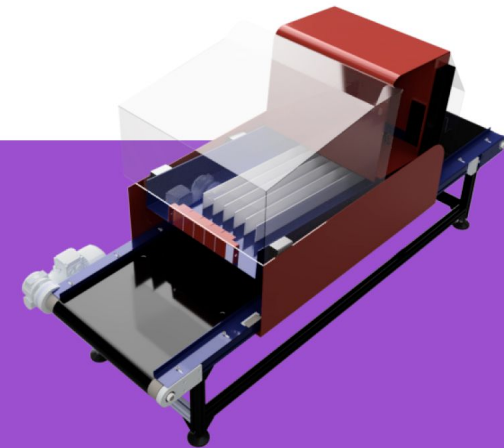

Salient features

- 1.5 mm to 1 cm thin cutting
- Involute blade for Precision cutting
- Automatic arranging of slices in trays
- 600mm loaf can be cut in 1 minute
- Demountable and portable structure

The Stacia Precision Slicing Machine was custom-made for Pumpkin Tales, a leading bakery and food processing company known for its high-quality products.

Spinach Cleaning Machine

The Spinach cleaning machine is specifically designed to clean spinach that is grown on the ground. The machine can handle up to 25kgs of spinach and efficiently washes the spinach with water to remove all the dirt and impurities. Additionally, the machine also dries off the spinach after the washing process, ensuring a clean and dry output that is ready for consumption or further processing.

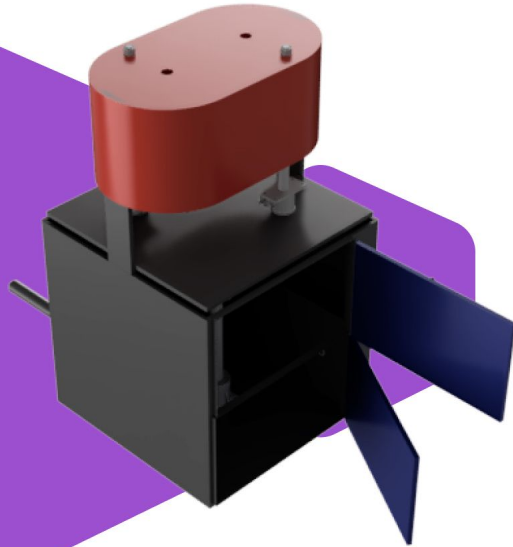

Salient features

- Highly efficient
- Portability due to its battery operation
- Lightweight due to optimized selection of material.
- Occupies Less Space
- High Temperature Operability
- Faster Spinach Unloading

Our custom spinach cleaning machine is a specialized product developed exclusively for **Nalla Keerai**. This machine helps to save time and labor by automating the spinach cleaning process, resulting in a faster and more efficient production process.

Stacia Baling Machine is a specially designed machine for Greater Chennai Corporation to help them in waste management. The machine helps to improve the efficiency of waste management processes and supports the sustainability efforts of Greater Chennai Corporation.

Stacia Baling Machine

The Stacia Baling Machine is a highly efficient waste management solution designed for compressing waste materials into cubes, reducing the volume of the waste by up to 75%. With this machine, waste materials such as plastic, paper, and cardboard can be compressed into cubes that are approximately 1/4th of their original size. The Stacia Baling Machine is easy to use and requires minimal maintenance. It has a high compression ratio that can handle up to 1000 kg of waste materials in a single operation.

The Stacia Baling Machine is ideal for use in recycling plants, waste management companies, and manufacturing facilities that generate a significant amount of waste. It is also useful for municipalities and government agencies that need to manage waste disposal in an efficient and cost-effective way.

Salient features

- Emergency Stop Button
- Faster Loading and Unloading
- Portability and Lightweight
- Cost Effective and Efficient
- High Temperature Operability

Stacia Smart Bottle

Introducing the revolutionary "Smart Bottle," a state-of-the-art smart device that redefines the way you experience hot and cold beverages. This cutting-edge product brings together cooling and heating capabilities in one compact and portable package, offering unmatched convenience and versatility.

With its integrated Bluetooth technology, the Reverse Kettle connects seamlessly to your smartphone, allowing you to control and monitor the temperature settings remotely.

Salient features

1. Instant heating and cooling
2. Rechargeable battery (5000 Mah) for 2 full days of usage
3. Hydration reminder
4. LED based indicator and ambient lighting
5. Temperature indicator
6. Bluetooth Connection tracks your hydration controls

Connect S

Introducing the Stacia Connect S Speaker, a sleek speaker that blends modern convenience with retro design, making it a stylish addition to any home, office, or studio. Featuring inbuilt Alexa and Google Assistant, it allows easy control of smart devices, setting reminders, and getting weather updates. The speaker offers Bluetooth and aux connectivity for streaming music from your devices, and includes a radio feature for tuning into your favorite stations. Its user-friendly display and button controls, combined with a timeless design, ensure it suits all ages and its compact size makes it easy to place in any room.

Salient features

- Voice control (Hey Stacia)
- Virtual assistant choice (Google Assistant or Alexa)
- Multi-room audio
- IoT integration and vulnerability detection
- Proactive assistant
- Enhanced audio (360°, room correction, noise cancellation)
- Expandable modules (projector, air sensor)
- Customizable wake word

Salient features

- Geo Fencing
- Map based location services
- Request based locator
- Direct distress calling
- Phone / tag finder
- Multiple tag detection
- User mode selection

Hardware Features

- GPS tracking module (e-sim based)
- Panic Button (SOS)
- Remote selfie clicker
- Finder light
- Bluetooth storage
- Rechargeable battery (Wireless)
- Tag finder

Stacia Child Tracking System

The Stacia Child Tracking Device is a cutting-edge GPS tracker designed to provide real-time location tracking of children. The device features a range of innovative functionalities such as an SOS button, finder light, wireless charging, and an e-SIM GSM module. The device also comes with a user-friendly app, which can be used by parents to track the live location of their children.

With this device, parents can be rest assured that their children's safety is being monitored at all times. In addition, the device can be used in various other sectors including offices, homes, pets and other valuable products. The compact and portable design of the device ensures that it can be easily carried around without any hassle.

The Stacia Child Tracking Device is built to withstand harsh environments and is constructed using high-quality materials. With its advanced features, the device provides an added layer of security and peace of mind to parents who are concerned about the safety of their children.

Stacia Smart Furniture

Stacia Smart Furniture integrates advanced technology with sleek design to enhance your living experience. Featuring a built-in AI assistant, integrated speaker, and microphone, it supports voice-activated commands for personalized assistance and device control. The furniture includes a built-in heater for hot beverages, wireless charging capabilities to eliminate clutter, and a popup socket with an LED light for easy power access. Discover the future of home living with Stacia Smart Furniture, combining cutting-edge technology with comfort in a stylish package.

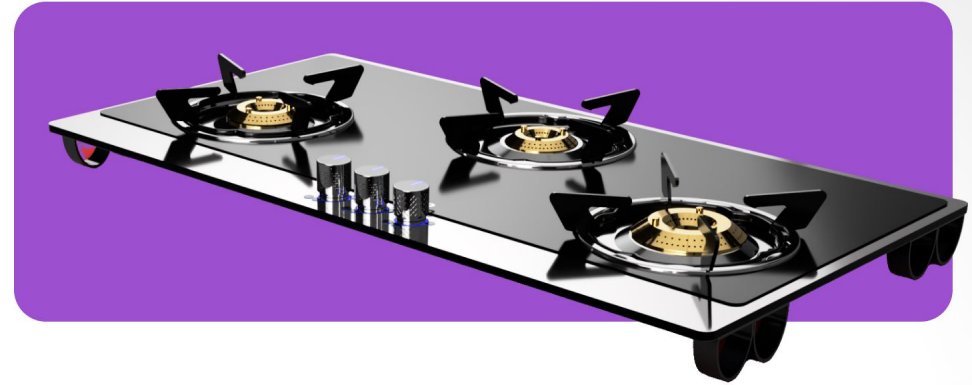

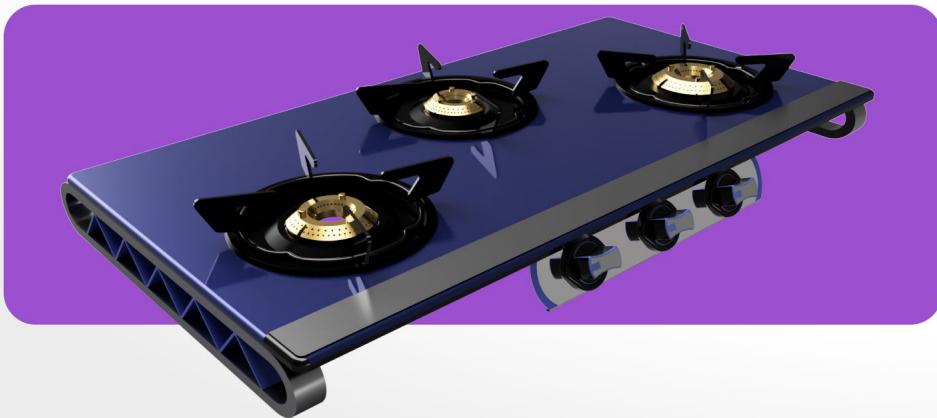

Salient features

- Ambient lighting
- Motion sensor based night light
- Smart speaker with "Hey Stacia"
- Dolby atmos surround experience (two bed side tables)
- Retractable Reading/working tray
- Wireless charger and pop up socket functionality
- Minimalistic inbuilt table lamp
- Inbuilt drawers finder light

Butterfly 3-Burner Stove

Introducing the Butterfly 3 Burner Stove, a harmonious blend of aesthetics and futuristic design that brings elegance and functionality to your kitchen. This state-of-the-art stove is thoughtfully crafted to elevate your cooking experience and enhance the visual appeal of your culinary space.

With its sleek and contemporary design, the Butterfly 3 Burner Stove adds a touch of modernity to any kitchen setting. The clean lines, smooth surfaces, and minimalist features create an aesthetically pleasing focal point, effortlessly blending with various kitchen styles.

With the fusion of Stacia's captivating design and Butterfly's exceptional performance, the Butterfly 3 Burner Stove is a true masterpiece that exceeds expectations. Its flawless combination of aesthetic appeal, precision cooking capabilities, and advanced safety features elevates your culinary experience to new heights. Embrace the harmonious union of style and performance with the Butterfly 3 Burner Stove, and unlock your culinary potential with confidence and elegance.
